Financial statements March 31, 2025

Independent auditor's report

To the Members of Woodstock Hospital

Opinion

We have audited the financial statements of **Woodstock Hospital** [the "Hospital"], which comprise the statement of financial position as at March 31, 2025, and the statement of changes in net assets, statement of operations, statement of remeasurement gains (losses), and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Hospital as at March 31, 2025, and its financial performance and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Hospital in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Hospital's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Hospital or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Hospital's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement
 resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery,
 intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Hospital's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based
 on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may
 cast significant doubt on the Hospital's ability to continue as a going concern. If we conclude that a material
 uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the
 financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based
 on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may
 cause the Hospital to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to financial statements

March 31, 2025

1. Purpose of the organization

Woodstock Hospital [the "Hospital"] is a Canadian public hospital dedicated to patient care. The Hospital is incorporated without share capital under the *Corporations Act* (Ontario). The 178-bed community hospital is located in the heart of southwestern Ontario. It serves a local catchment of 55,000 and over 100,000 within Oxford County. Services include Maternal/Child Women's Health, Critical Care, Surgical Services, Medicine, Complex Continuing Care, Rehabilitation and Mental Health. In addition to the emergency department, there are also a number of outpatient services including dialysis, chemotherapy, diagnostic imaging, laboratory, diabetes, cardio-respiratory, physical and speech therapy, and a variety of mental health programs. The Hospital works closely with its community partners to provide patients with healthcare services close to home. The Hospital is a registered charity under the *Income Tax Act* (Canada) and, as such, is not subject to income taxes.

The Hospital operates under a Hospital Service Accountability Agreement ["H-SAA"] and a Multi-Sector Service Accountability Agreement ["M-SAA"] with Ontario Health ["OH"]. These agreements set out the rights and obligations of the two parties in respect of funding provided to the Hospital. The H-SAA and M-SAA set out the funding provided to the Hospital together with performance standards and obligations that establish acceptable results for the Hospital's performance. The Hospital retains any excess or deficiency of revenue over expenses during the year in accordance with the H-SAA. The Hospital is primarily funded by the Ministry of Health ["MOH"] and OH.

2. Summary of significant accounting policies

These financial statements are prepared in accordance with the *CPA Canada Public Sector Accounting Handbook* ["PS"], which sets out generally accepted accounting principles for government not-for-profit organizations in Canada. The Hospital has chosen to use the standards specific to government not-for-profit organizations as set out in PS 4200 to PS 4270. The significant accounting policies are summarized as follows:

Basis of presentation

These financial statements represent the operations of the Hospital including funds held for special or endowment purposes. The financial statements do not include the assets, liabilities and activities of any other organizations, such as the Woodstock Hospital Foundation [the "Foundation"] that, although related to the Hospital, are not controlled by it.

Remeasurement gains and losses

Remeasurement gains and losses are reported according to their nature, including changes in market value for derivatives, portfolio investments in equity instruments and financial instruments designated at fair value. Also included are gains or losses in foreign exchange for items denominated in a foreign currency.

Foreign currency

Foreign currency transactions are recorded at the exchange rate at the time of the transaction. Assets and liabilities denominated in foreign currencies are recorded at fair value using the exchange rate as at the financial statement date. Unrealized foreign exchange gains and losses are recognized in the statement of remeasurement gains (losses). In the period of settlement, the realized foreign exchange gains and losses are recognized in the statement of remeasurement gains (losses).

Notes to financial statements

March 31, 2025

statement of operations and the unrealized balances are reversed from the statement of remeasurement gains (losses).

Revenue recognition

The Hospital follows the deferral method of accounting for contributions. Unrestricted contributions are recorded as revenue when received or receivable if the amount to be received can be estimated and collection is reasonably assured. Externally restricted contributions are deferred when initially recorded in the accounts and recorded as revenue in the period in which the related expenses are recorded. Endowment contributions are recorded as direct increases in endowment net assets.

Contributions externally restricted for capital assets are recorded as deferred capital contributions and are amortized to operations on the same basis as the related asset is depreciated.

Revenue from ancillary services and other patient services is recognized when the goods have been sold or when the services have been rendered.

Investment income recorded in the statement of operations consists of interest, dividends, and realized gains and losses, net of related fees. Unrealized gains and losses are recorded in the statement of remeasurement gains (losses), except to the extent they relate to deferred contributions, in which case they are added to the deferred contributions.

Cash and restricted cash and cash equivalents

Cash and restricted cash and cash equivalents consist of cash on deposit and short-term investments readily convertible to cash.

Inventories

Inventories are valued at the lower of cost and net realizable value, with cost being determined on a first-in, firstout basis. Reviews for obsolete, damaged and expired items are performed on a regular basis, and any items that are found to be obsolete, damaged or expired are written off when such determination is made.

Long-term investments

The Hospital has interests in economic activities where there is shared ownership of these activities by the venturers. The accounts of these joint venture activities are included in the accompanying financial statements following the modified equity method. The modified equity method is a basis of accounting for the Hospital's business partnerships, whereby the equity method of accounting is only modified to the extent the venturer's accounting policies are not adjusted to conform with those of the Hospital.

Capital assets

Capital assets are valued at the cost incurred by the Hospital at the date of acquisition. All direct costs and interest related to building and equipment projects are capitalized during the period of construction until the project is complete.

Notes to financial statements

March 31, 2025

Amortization is provided on a straight-line basis over the estimated useful lives of the assets. Amortization commences in the year an asset is put into use and is discontinued in the year of disposal. The rates of amortization are as follows:

Buildings	50 years
Land improvements	8 years
Equipment and furnishings	5–20 years
Software	5 years

When capital assets are disposed of, the related cost and accumulated amortization are removed from the respective accounts and any gain or loss is reflected in the statement of operations.

No amortization is recorded on construction in progress until construction is substantially complete and the assets are ready for productive use.

Capital assets are reviewed for impairment whenever events or changes in circumstances indicate that the asset no longer has any long-term service potential to the Hospital. When a capital asset no longer contributes to the Hospital's ability to provide services, its carrying amount is written down to its residual value.

Asset retirement obligations

Asset retirement obligations are recorded in the period during which a legal obligation associated with the retirement of a capital asset is incurred and when a reasonable estimate of this amount can be made. The asset retirement obligation is initially measured at the best estimate of the amount required to retire a capital asset at the financial statement date. A corresponding amount is added to the carrying amount of the related capital asset and is then amortized over its remaining useful life. Changes in the liability due to the passage of time are recognized as an accretion expense in the statement of operations, with a corresponding increase in the liability.

The estimated amounts of future costs to retire the assets are reviewed annually and adjusted to reflect the thencurrent best estimate of the liability. Adjustments may result from changes in the assumptions used to estimate the undiscounted cash flows required to settle the obligation, including changes in estimated probabilities, amounts and timing of settlement as well as changes in the legal requirements of the obligation, and in the discount rate. These changes are recognized as an increase or decrease in the carrying amount of the asset retirement obligation, with a corresponding adjustment to the carrying amount of the related asset. If the related capital asset is no longer in productive use, all subsequent changes in the estimate of the liability for asset retirement obligations are recognized as an expense in the period incurred. A liability continues to be recognized until it is settled or otherwise extinguished.

The Hospital has no significant liabilities with respect to asset retirement obligations.

Notes to financial statements

March 31, 2025

Public private partnerships

Public private partnerships ["P3s"] are recognized in the Hospital's financial statements over the construction period for P3s:

- Between the Hospital and a private sector partner for infrastructure-project delivery;
- With risk allocation that provides for Hospital control of the asset at any point during the arrangement; and
- In which the private sector partner [i] designs, builds, acquires or betters new or existing infrastructure, [ii] finances the transaction past the point where the infrastructure is ready for use, and [iii] operates and/or maintains the infrastructure.

For such P3s, the Hospital initially recognizes the constructed or acquired infrastructure asset at cost, which represents fair value at the date of recognition, and a corresponding liability at the same amount as the related infrastructure asset, reduced for any consideration previously provided to the private sector partner. The asset is subsequently measured in accordance with the policies for capital assets. Depending on the arrangement, consideration may be transferred from the Hospital to the private sector partner, to settle the associated liability, through a combination of the financial liability and the user-pay models.

Lifecycle payments under such P3s are determined to either be betterments or operating and maintenance expenses. Betterments are added to the carrying amount of the related infrastructure when the future economic benefits of the betterment are controlled by the Hospital. Operating and maintenance expenses are expensed in a rational and systematic manner that best corresponds to the benefit received from the services being provided over the term of the service contract.

Contributed services and materials

A substantial number of volunteers contribute a significant amount of their time each year. Because the fair value of these contributed services is not readily determinable, they are not recognized in these financial statements.

Use of estimates

The preparation of the Hospital's financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as at the date of the statement of financial position and the reported amounts of revenue and expenses during the reporting period. The inherent uncertainty involved in making such estimates may impact the actual results reported in future periods.

The amount of revenue recognized from the MOH and OH requires estimation.

The H-SAA sets out certain performance standards and obligations that establish acceptable results for the Hospital's performance in a number of areas. If the Hospital does not meet its performance standards or obligations, OH and/or the MOH have the right to adjust funding received by the Hospital. OH and the MOH are not required to communicate certain funding adjustments until after the submission of the year-end data. Since this data is not submitted until after the completion of the financial statements, the amount of the funding received during the year from OH and the MOH may be increased or decreased subsequent to the year-end.

Notes to financial statements

March 31, 2025

Other significant items subject to such estimates and assumptions include the valuation of accounts receivable, the carrying amount of capital assets and the employee future benefits liability.

Financial instruments

Financial instruments are classified in one of the following categories: [i] fair value or [ii] cost or amortized cost. The Hospital determines the classification of its financial instruments at initial recognition. The financial instruments are measured as follows:

- Current and long-term receivables and accounts payable and accrued liabilities are measured at cost, net of any provisions for impairment;
- Long-term obligations are measured at amortized cost using the effective interest rate method, net of any provisions for impairment; and
- Portfolio investments are measured at fair value as they are managed and evaluated on a fair value basis.

Transaction costs related to financial assets and financial liabilities measured at fair value are expensed as incurred.

The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. The fair value of a financial instrument on initial recognition is the transaction price at the trade date, which is the fair value of the consideration given or received. Subsequent to initial recognition, the fair values of financial instruments that are quoted in active markets are based on bid prices for financial assets held and offer prices for financial liabilities. When independent prices are not available, fair values are determined by using valuation techniques that refer to observable market data. These include comparisons with similar instruments where market observable prices exist, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants.

A change in the fair value of a financial instrument in the fair value category is recognized in the statement of remeasurement gains (losses) as a remeasurement gain or loss until the financial instrument is derecognized. In the reporting period that a financial instrument in the fair value category is derecognized, the accumulated remeasurement gain or loss associated with the derecognized item is reversed and reclassified to the statement of operations. There were changes in fair value of financial instruments during the year; therefore, the statement of remeasurement gains (losses) was required.

As at each financial statement date, the Hospital assesses financial assets or groups of financial assets to determine whether there is any objective evidence of impairment. When there has been a loss in value of an investment that is other than a temporary decline, the investment is written down to recognize the loss. A loss in value of an investment that is other than a temporary decline occurs when the actual value of the investment to the Hospital becomes lower than its cost or amortized cost, adjusted for any write-downs recorded in previous reporting periods, and the impairment is expected to remain for a prolonged period. The write-down is included in the statement of operations. A write-down of an investment to reflect a loss in value is not to be reversed if there is a subsequent increase in value.

Notes to financial statements

March 31, 2025

Post-employment benefits

The Hospital accrues its obligations and the related costs under employee benefit plans. The cost of employee future benefits earned by employees is actuarially determined using the projected accrued benefit cost method prorated on service using best estimates of salary escalation, retirement ages of employees and expected health care costs. The discount rate used to determine the accrued benefit obligation represents the Hospital's cost of borrowing. Differences arising from past service costs are expensed in the period of plan amendment. Differences arising from changes in assumptions and actuarial gains and losses are amortized in the statement of operations on a straight-line basis over the expected average remaining active service life of employees.

Multi-employer benefit plan

Defined contribution plan accounting is applied to the multi-employer defined benefit plan, whereby contributions are expensed on an accrual basis, as the Hospital has insufficient information to apply defined benefit plan accounting.

3. Woodstock Hospital Foundation

The Foundation is an organization without share capital under the laws of Ontario that engages in fundraising activities on behalf of the Hospital. The Foundation relies on the Hospital to provide payroll, facilities and other administrative support, and reimburses the Hospital for costs incurred on its behalf. In addition, the Foundation transferred funds of \$325,218 [2024 – \$1,970,769] for capital purposes to the Hospital during the year [notes 8 and 12].

4. Cash and restricted cash and cash equivalents

Cash consists of the following:

	2025	2024
	\$	\$
Cash	197,465	10,082,683
Treasury account for operations	8,565	8,184
	206,030	10,090,867
Restricted cash and cash equivalents consist of the following:		
	2025	2024
	\$	\$
Internally restricted cash [a]	8,944,724	8,068,959
Endowments [b]	542,398	542,398

Externally restricted cash [c] 16,086,566 25,573,688

[a] Internally restricted cash is restricted by the Hospital's Board of Directors and management for non-operating purposes.

14,033,532

22,644,889

Notes to financial statements

March 31, 2025

- [b] The equity portion of the endowments must remain intact, and the earned revenue on this fund can be used for other purposes. Refer to note 9 for further details.
- [c] Externally restricted cash is restricted by the MOH for the construction, maintenance and financing of the new hospital. Refer to note 14 for further details.

As at March 31, 2025, the credit facility established with the Hospital's bankers consists of a credit line of \$5,000,000 [2024 – \$5,000,000] bearing interest at the bank's prime rate [4.95%] to be used for general operating purposes. No amount has been drawn on this facility as at March 31, 2025 and 2024.

Included in cash and restricted cash and cash equivalents are short-term investments readily convertible to cash of \$52,317 [2024 – \$243,274].

5. Portfolio investments

Portfolio investments consist of the following:

	2	025	2	024
	Fair value hierarchy	Market value \$	Fair value hierarchy	Market value \$
Fixed income	Level 2	12,613,004	Level 2	11,438,119
Equities	Level 1	6,081,523	Level 1	5,356,866
		18,694,527		16,794,985

6. Long-term investments

Oxford ProResp Inc.

Effective January 1, 1995, Oxford ProResp Inc. was incorporated as a joint venture between the Hospital and a third party for the purposes of providing home care services to clients in Oxford County. The Hospital received 50 common shares; and 100 special Class A shares in exchange for a promissory note in the amount of \$100,000, which was fully repaid in fiscal 2001. In fiscal 2004, the common shares were exchanged for Class A common shares at an amount equal to the original value. The investment is being accounted for according to the modified equity method and, as such, is stated at cost plus income less dividends since inception.

	2025 \$	2024 \$
Special Class A shares	100,000	100,000
Class A common shares	50	50
Share of income since inception	617,891	617,891
Dividends received since inception	(617,000)	(617,000)
	100,941	100,941

Notes to financial statements

March 31, 2025

Management fees in the amount of \$100,000 [2024 – \$115,000] from Oxford ProResp Inc. have been recorded as other revenue. Transactions are in the normal course of business and are recorded at their exchange amount, which is the amount agreed upon by both parties.

7. Capital assets

Capital assets consist of the following:

	2025		2024	
	Cost	Accumulated amortization	Cost	Accumulated amortization
	\$	\$	\$	\$
Land and land improvements – Juliana	3,122,361	668,508	3,122,361	501,381
Building – Juliana	223,403,672	60,738,956	222,382,290	56,270,882
Building – Athlone	9,074,716	2,056,962	9,074,716	1,875,468
Building – Finkle	15,454,116	645,954	14,972,068	336,872
Building – Wellness Centre	1,842,556	_	_	_
Equipment and furnishings	54,714,784	35,618,949	48,651,863	32,627,323
Software	5,730,208	4,394,461	4,361,358	3,883,356
Construction in progress	1,270,213	—	—	—
	314,612,626	104,123,790	302,564,656	95,495,282
Less accumulated amortization	104,123,790		95,495,282	
Net book value	210,488,836		207,069,374	

8. Deferred contributions

Deferred contributions consist of the following:

	2025 \$	2024 \$
Expenses of future periods [a]	517,905	517,079
Capital assets [b]	172,193,533	176,502,049
	172,711,438	177,019,128

Notes to financial statements

March 31, 2025

[b]

[a] Deferred contributions related to expenses of future periods

Deferred contributions related to expenses of future periods represent unspent grants and investment income earned on unspent externally restricted donations for nursing education and palliative care.

	2025 \$	2024 \$
Balance, beginning of year	517,079	593,302
Investment income (loss) on unspent deferred contributions	826	(76,223)
Balance, end of year	517,905	517,079
Deferred contributions related to capital assets		
Deferred contributions related to capital assets are as follows:		
	2025 \$	2024 \$
Balance, beginning of year	176,502,048	179,370,998
Additional contributions received [note 3]	690,200	2,242,017
Investment gain on unspent capital contributions	536,984	390,456
Amounts amortized to revenue	(5,535,699)	(5,501,423)
Balance, end of year	172,193,533	176,502,048

The balance of deferred contributions related to capital assets consists of the following:

	2025 \$	2024 \$
Unamortized capital contributions used to purchase capital assets Unspent contributions	163,248,809 8.944.724	168,433,090 8,068,958
	172,193,533	176,502,048

9. Restrictions on net assets

All of the net assets restricted for endowment purposes are subject to externally imposed restrictions stipulating that the principal be maintained intact in perpetuity *[note 4]* and that investment income on endowment funds be restricted for capital purposes and added to deferred capital contributions.

10. Contract with the Ministry of Children, Community and Social Services

The Hospital has a service contract with the Ministry of Children, Community and Social Services. One requirement of the contract is the production by management of a Transfer Payment Annual Reconciliation, which shows a summary by service of all revenue and expenditures and any resulting surplus or deficit that relates to the contract. During the year, the Hospital received revenue and incurred expenses as follows:

Notes to financial statements

March 31, 2025

11. Employee future benefits

[a] Pension plan

Pension benefit costs are expensed as related contributions are made to the Healthcare of Ontario Pension Plan ["HOOPP"]. All of the employees of the Hospital are members of HOOPP, which is a multi-employer, defined benefit, final average earnings and contributory pension plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the five consecutive years prior to retirement, termination or death that provides the highest earnings. The Hospital's contributions to HOOPP during the year amounted to 7,131,347 [2024 – 7,059,192], of which 828,690 [2024 – 771,971] was owing as at March 31, 2024 and is recorded in other accounts payable and accrued liabilities on the statement of financial position.

The financial statements for the year ended December 31, 2024 for HOOPP disclosed net assets available for benefits of \$123,017 million [2023 – \$112,635 million] with pension obligations of \$112,579 million [2023 – \$102,454 million], resulting in a surplus of \$10,438 million [2023 – \$10,181 million].

[b] Other post-employment benefits

Retirees are eligible for life insurance, medical and dental benefits covered under the non-pension postretirement benefit plan after they turn 55. The plan is funded on a pay-as-you-go basis, and the Hospital funds on a cash basis as benefits are paid. During the year, benefits paid totaled \$222,122 [2024 – \$208,444].

The most recent actuarial valuation was completed as at March 31, 2025, and significant actuarial assumptions adopted in measuring the Hospital's accrued benefit obligation for post-employment benefits are as follows:

	2025 \$	2024 \$
Accrued benefit obligation		
Discount rate	4.3%	4.5%
Healthcare trend rate inflation increase	5.0%	4.8%
Accrued benefit expense		
Discount rate	4.5%	4.6%

The healthcare inflation increase is expected to decrease to an ultimate rate of 4.05% in 2041 and thereafter. The expected average remaining service life of employees is 13.3 years.

Notes to financial statements

March 31, 2025

The following table presents information related to the Hospital's post-retirement benefits as at March 31, including the amounts recorded on the statement of financial position, and components of net periodic benefit cost:

	2025	2024
	\$	\$
Accrued benefit obligation		
Balance, beginning of year	3,466,500	2,006,400
Current service cost	198,100	116,800
Interest cost	160,200	92,800
Benefits paid	(239,300)	(176,900)
Actuarial loss	72,000	1,427,400
Balance, end of year	3,657,500	3,466,500
Unamortized net actuarial gain	(996,200)	(985,000)
Post-employment benefits liability	2,661,300	2,481,500

During the year, employees contributed \$126,819 [2024 – \$118,890]. Unamortized actuarial gains are amortized over the average remaining service period. The Hospital's benefit plan expense was as follows:

	2025 \$	2024 \$
Current service cost	198,100	116,800
Interest cost	160,200	92,800
Amortization of net actuarial loss (gain)	60,800	(40,000)
Net benefit plan expense	419,100	169,600

12. Related party transactions

Amounts due from related entities included in other accounts receivable are as follows:

	2025 \$	2024 \$
Oxford ProResp Inc. [note 6]	100,000	115,000
Woodstock Hospital Foundation [note 3]	117,386	83,700
	217,386	198,700

On April 30, 2025, the Board of Directors passed a resolution to transfer funds in the amount of \$263,947 [2024 – \$195,208] in new proceeds from the operations of the medical building to the Foundation. This transfer has occurred as a result of the donation agreement in place with the Foundation and is recorded in other accounts payable and accrued liabilities, and supplies and other expenses.

Transactions are in the normal course of business and are recorded at their exchange amount, which is the amount agreed upon by both parties.

Notes to financial statements

March 31, 2025

13. Statement of cash flows

The net change in non-cash working capital balances related to operations consists of the following:

	2025	2024
	\$	\$
Decrease (increase) in current assets		
Ministry of Health/Ontario Health accounts receivable	(657,033)	1,909,655
Other accounts receivable	(899,158)	194,046
Inventories	92,045	(173,683)
Prepaid expenses	(458,064)	(101,217)
	(1,922,210)	1,828,801
Increase (decrease) in current liabilities		
Ministry of Health/Ontario Health accounts payable	(779,603)	(1,778,462)
Other accounts payable and accrued liabilities	3,626,971	1,852,491
Current portion of deferred contributions	826	517,079
	2,848,194	591,108
	925,984	2,419,909

14. Long-term obligation

The Hospital entered into an alternative financing and procurement ["AFP"] project agreement under Infrastructure Ontario for the construction, financing and maintenance of a new hospital in Woodstock. This project meets the definition of a P3 under PS 3160. The project was built and financed during the construction period by an unrelated joint venture created to carry out the construction within the AFP agreement. Construction commenced in October 2008 and was substantially complete in June 2011. Under the terms of the project agreement, payments that total approximately \$584 million will be made by the Hospital over a 30-year period, with payments having commenced after the substantial completion date. Of this total amount, payments for principal and interest are expected to be \$397 million. As at March 31, 2025, an obligation of \$123 million [2024 – \$126 million] has been recorded related to outstanding principal amounts. Based on the agreement signed with the MOH, the Hospital has recognized the share of MOH funding for the new hospital as a long-term receivable in the amount of \$118 million [2024 – \$123 million] and a corresponding deferred contribution. The current portion of the receivable is \$4 million [2024 – \$4 million] with a corresponding current liability of \$4 million [2024 – \$4 million].

Over the 30-year period, payments related to facilities and lifecycle maintenance are expected to be \$133 million and \$42 million, respectively. Payments related to facilities and lifecycle maintenance costs will be indexed over the term of the agreement to provide for changes in certain operating costs. The Hospital has entered into an agreement with the MOH to share in these project costs based on MOH funding policy. The MOH share of costs associated with constructing the new hospital is 90%.

Notes to financial statements

March 31, 2025

In addition, a Sinking Fund Trust Account was opened by the Hospital according to requirements under the Development Accountability Agreement with the MOH. The primary purpose of this fund was to hold amounts equal to the Hospital's share of the costs associated with constructing the new hospital in trust for future disbursement to other parties. It currently holds \$3,869,152 in restricted cash and cash equivalents [2024 – \$2,612,821] [note 4].

Unspent capital funds received of \$11.8 million [2024 – \$11.3 million] from the MOH for new hospital development costs are restricted by the MOH for that purpose and have been shown in the financial statements as part of the MOH payable and included in the Hospital's restricted cash *[note 4]*.

Future annual principal payments reducing the long-term obligation are equal to future payments to be received from the MOH, as follows:

	\$
2026	3,951,930
2027	4,267,807
2028	4,608,932
2029	4,977,323
2030	5,375,160
Thereafter	99,652,185

These principal payments are included in the obligation table shown in note 15 below.

15. Commitments

Future annual principal, interest, service, and facilities and lifecycle maintenance payments to pay for operating facility obligations are as follows:

	Hospital		
	MOH share	share	Total
	\$	\$	\$
2026	14,817,435	3,991,798	18,809,233
2027	14,433,473	3,804,974	18,238,447
2028	14,312,971	3,864,336	18,177,307
2029	16,107,399	4,158,475	20,265,874
2030	16,528,302	4,286,788	20,815,090
Thereafter	188,818,867	54,324,640	243,143,507

A portion of these future obligations is to be funded by the MOH over the term of the contract [note 14].

Notes to financial statements

March 31, 2025

16. Contingencies

- [a] The Hospital is subject to certain actual and potential legal claims that have arisen in the normal course of operations. Where the potential liability is likely and able to be estimated, management records its best estimate of the potential liability. In other cases, the ultimate outcome of the claims cannot be determined at this time. Any additional losses related to claims will be recorded in the year during which the liability is able to be estimated or adjustments are determined to be required. With respect to claims as at March 31, 2025, it is management's position that the Hospital has valid defences and appropriate insurance coverage to reimburse the cost of unfavourable settlements, if any, that may result from such claims.
- [b] The Hospital routinely engages in collective bargaining and is subject to various human rights matters under provincial legislation when employees or groups within the bargaining units file grievances against the Hospital or when the collective bargaining agreements are negotiated, which may result in retroactive pay.
- [c] The Hospital is a member of the Healthcare Insurance Reciprocal of Canada ["HIROC"] and therefore has an economic interest in HIROC. HIROC is a pooling of the public liability insurance risks of its hospital members. All members of the HIROC pool pay annual premiums that are actuarially determined. All members are subject to assessment for losses, if any, experienced by the pool for the years in which they were members. No assessments have been made for the year ended March 31, 2025.

Since its inception in 1987, HIROC has accumulated an unappropriated surplus, which is the total of premiums paid by all subscribers plus investment income, less the obligation for claims reserves and expenses and operating expenses.

In 2012, the Hospital entered into an agreement with HIROC whereby HIROC continues to provide indemnity insurance to hospitals; however, the cost of investigating and defending any litigation claims, previously included in the insurance premium, will be borne by the Hospital. Under the agreement, the Hospital provides deposits to HIROC Management Limited, which acts as an agent to pay legal expenses on behalf of the Hospital. During the year, nil deposits were paid to HIROC [2024 – nil].

17. Financial instruments

The Hospital's operations and investment activities expose it to a range of financial risks. To manage the risks identified for its investments, the Hospital has an investment policy setting out a target mix of investments designed to provide optimal rate of return within reasonable risk tolerances. The investment policy is reviewed annually.

Market risk

Market risk is the risk that changes in market prices and market conditions, such as foreign exchange rates or interest rates, will affect the Hospital's excess of revenue over expenses or the value of its holdings of financial instruments. The objective of market risk management is to control market risk exposures within acceptable parameters while optimizing return on investment.

Notes to financial statements

March 31, 2025

Foreign exchange risk

The Hospital is exposed to financial risks as a result of exchange rate fluctuations and the volatility of these rates.

The Hospital is exposed to foreign exchange risk with respect to investments denominated in US dollars and other international currencies. As at March 31, 2025, the Hospital held C\$3,323,952 [2024 – C\$2,923,245] of investments denominated in US dollars.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Financial assets with fixed interest rates expose the Hospital to fair value interest rate risk. The Hospital is not exposed to interest rate risk on financial liabilities.

The Hospital's investments including bonds are disclosed in note 5. To manage the risks identified for its investments, the Hospital has an investment policy setting out a target mix of investments designed to provide optimal rate of return within reasonable risk tolerances. The investment policy is renewed annually.

Credit risk

Credit risk is the risk of financial loss occurring as a result of default or insolvency of a borrower on its obligations to the Hospital. The Hospital monitors the credit risk on a regular basis. The Hospital is exposed to credit risk with respect to cash, restricted cash and cash equivalents, portfolio investments and accounts receivable. The majority of the Hospital's receivables are from government entities, which minimizes the risk of non-collection for accounts receivable. The maximum credit risk is the carrying value of these assets. During fiscal 2024, the Hospital invested in bonds, thereby increasing credit exposure. The maximum exposure to credit risk relating to investments is outlined in note 5. The Hospital does not invest in bonds below investment grade.

Liquidity risk

Liquidity risk is the risk of the Hospital being unable to meet its cash requirements in a timely and cost-effective manner. The Hospital has a planning and budgeting process in place to help determine the funds required to support the Hospital's normal operating requirements on an ongoing basis. The Hospital also manages its liquidity risk by forecasting cash flows from operations and anticipated investing, capital and financing activities, and maintaining credit facilities to ensure it has sufficient available funds to meet current and foreseeable financial requirements.

Financial instrument classification

Financial instruments measured at fair value are classified according to a fair value hierarchy that reflects the reliability of the data used to determine fair value. The fair value hierarchy is made up of the following levels:

- Level 1 Valuation based on quoted prices [unadjusted] in active markets for identical assets or liabilities;
- Level 2 Valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 Valuation techniques using inputs for the asset or liability that are not based on observable market data [unobservable inputs].

Notes to financial statements

March 31, 2025

The fair value hierarchy requires the use of observable data from the market each time such data exists. A financial instrument is classified at the lowest level of the hierarchy for which significant input has been considered in measuring fair value.

Cash and portfolio investments held by the Hospital are classified as Level 1 and Level 2, respectively, according to the fair value hierarchy described above. There have been no material transfers between Levels 1 and 2 for the year ended March 31, 2025.

18. Oxford and Area Ontario Health Team

Introduced by the provincial government in February 2019, Ontario Health Teams ["OHTs"] are a new model of healthcare delivery that puts patients, families and caregivers at the center of the healthcare system. The OHT model of care was introduced as a signature initiative for healthcare transformation, enshrined in legislation through the *Connecting Care Act, 2019*. OHTs are intended to improve the coordination of care and services for patients and their families/caregivers across multiple care settings. The Oxford and Area OHT brings together over 30 healthcare organizations across all sectors of care to collaborate as one team. The Oxford and Area OHT has identified the Hospital as a member organization to serve on the OHT's behalf as the implementation funding recipient; the Hospital has entered into a transfer payment agreement with the province to receive funds on behalf of the Oxford and Area OHT.

	2025 \$	2024 \$
Revenue		
Ontario Health – implementation funding	1,293,222	852,143
Ontario Health – patient and healthcare navigation	27,107	24,672
Other	9,717	9,320
	1,330,046	886,135
Expenses		
Salaries and benefits	769,449	643,680
Supplies and other	480,325	234,823
	1,249,774	878,503
	80,272	7,632

The amount due from Oxford and Area OHT as at March 31, 2025 is \$357,243 [2024 – \$107,728] and is contained within other accounts receivable.
